Viewing self-assessment results

The 'Self-assessment results' screen features four tabs:

- My results
- Recommendations
- Compare results
- My answers

My Results

After completing a self-assessment, your scores will be displayed visually on the 'My results' tab screen. The first chart shows your percentage progress to achieving each of the nine individual Standards.

The bars are colour-coded as follows:

- Red: Aspiring (0-49%)
- Green – Achieving (50-89%)
- Blue – Exceeding (90-100%)

Recommendations

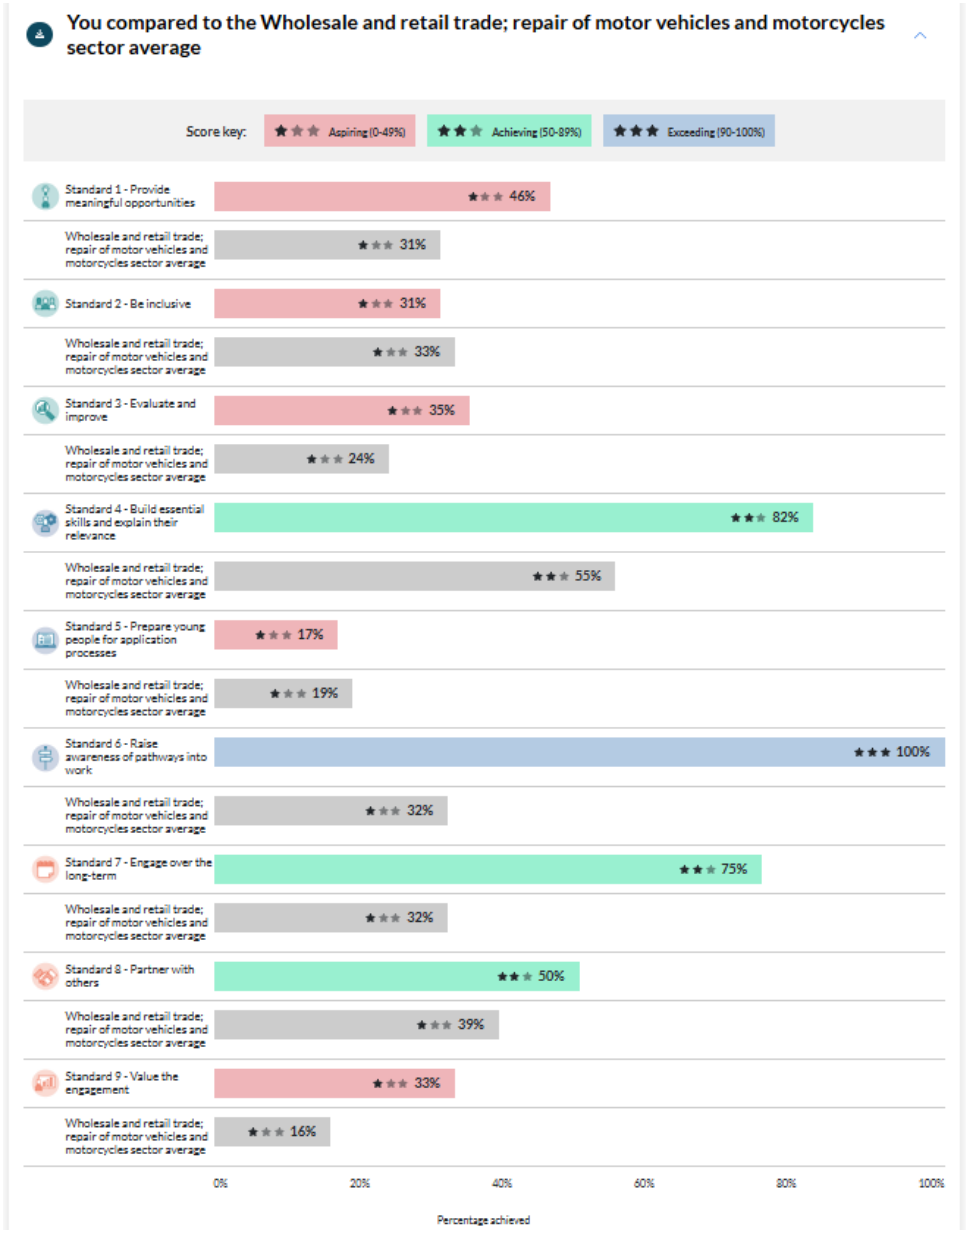

The second tab provides you with recommendations on how to improve your Employer Standards scores (this will also have been emailed to your upon completing your assessment, along with a badge to demonstrate your commitment to quality).

A panel for each Standard shows:

- Your percentage progress towards achieving the Standard
- Understand the evidence - why it is important for employers (and Sole Traders) to progress in each Standard. You can use these documents to build a business case for investing more in this area, or to back-up why it is important that you are exceeding in this Standard.
- Planning your next steps - Take Action document, to help you to improve your progress in each Standard. They contain actions you can take today and others you can plan out over the next year. They are curated by size of employer and level of achievement in each Standard.
- Hear from a peer - videos so you can hear from other employers who have scored exceeding in this category as they share their best practice and lessons learned.

Compare results

The charts on this tab screen enable you to compare your employer self-assessment score with National, Sector and Regional average scores.

Above example: your self-assessment score compared to National average.

National average: This chart enables you to compare your self assessment scores against the average scores of all employers nationally in your size category. You can also use the dropdown to compare your self assessment scores against the average score of the top 10% of employers scoring highest for this Standard.

Sector average: This chart enables you to compare your self assessment scores against the average scores of all employers within your sector.

Regional average: This chart enables you to compare your self assessment scores against the average scores of all employers with your region. (Note: this defaults to a comparison against the region covering the postcode of your registered office).

My answers

This tab displays the answers you selected for each Employer Standards when completing the self-assessment.
